RESEARCH PROJECTS

Biochemical characterization of lipoid proteinosis. Dermatology Foundation Research Grant, 1986 ("Mucopolysaccharide Metabolism in Lipoid Proteinosis").

Acyclovir in Varicella: A Utility of Acyclovir in normal children (aged 2- 18 years) with varicella. (Burroughs-Wellcome)

Ketotifen in the management of pruritus due to cholestasis (compassionate use). (Sandoz)

Ketotifen in the management of capillary hemangiomas (compassionate use). (Sandoz)

Ultraviolet light therapy as a means for maintaining Vitamin D sufficiency in children with chronic cholestatic liver disease. (GCRC, Baylor College of Medicine)

Hydrolyzed whey protein in an infant formula to prevent relapse of eczema in infants. (Carnation)

Gene localization of incontinentia pigmenti

A phase III randomized, double blind, parallel, placebo-controlled study to evaluate safety and efficacy and rollover open label study to evaluate long-term safety of Glylorin7 in the treatment of non-bullous congenital ichthyosiform erythroderma. (Cellegy/Glaxo/PI)

A multicenter, randomized, double-blind parallel, vehicle-control study of efficacy and safety of Fluticasone propionate lotion 0.05% applied q daily for up to 4 weeks in the treatment of adult and pediatric subjects with moderate to severe atopic dermatitis. (Glaxo Welcome, Inc/PI)

A randomized, single-blind, study comparing the S-Cain peel to EMLA cream for induction of local anesthesia prior to pulsed dye laser therapy in pediatric subjects. (ZARS/PI)

A randomized, double-blind study of Protopic® 0.03% (Tacrolimus Ointment) vs. vehicle ointment in

pediatric patients with mild to moderate atopic dermatitis. (Fujisawa Healthcare, Inc/PI)

A 6-month open-label, multi-national, effectiveness, and safety study of Elidel® (pimecrolimus) cream, 1% in subjects with atopic dermatitis (AD). (Novartis Pharmaceuticals/PI)

A Randomised, Double-Blind, Placebo-Controlled, Dose Response Study of the the Safety and Efficacy of Thymosin Beta 4 in the Treatment of Patients with Epidermolysis Bullosa (Regenerex/PI)

Use of Dermagraft for Wound Management of Epidermolysis Bullosa under HDE (PI)

Histamine Pharmacogenetics in Children with Atopic Dermatitis (PPRU/PI)

Investigation of the Safety/Efficacy of Elidel (pimecrolimus) 1% cream in Atopic Disease Modification, Assessed in a Double-Blind vehicle Controlled Phase to Evaluate Effects on Atopic Dermatitis in Infants, and a 2.3 yr Open-Label Phase to Evaluate the Effect of Early Intervention Versus Delayed Intervention with Elidel ® on the Incidence of Asthma in Children (Novartis/PI)

Investigation of terbinafine vs griseofulvin for the treatment of childhood tinea capitis (Novartis/PI)

Use of imiquimod for the treatment of childhood molluscum contagiosum, 3 studies (3M/PI)

The Molecular Basis and Clinical Spectrum of Rothmund-Thomson Syndrome (GCRC/Co-investigator)

A Randomized, Double-Blind, Placebo-controlled, Dose-response Study of the Safety and Efficacy of Thymosin Beta 4 in the treatment of patients with Epidermolysis Bullosa (RegeneRx Biopharmaceuticals, Inc.)

An investigation of the safety and efficacy of Elidel 1% cream in atopic disease modification, assessed in a 3-year randomized double-blind vehicle controlled phase to evaluate effects on atopic dermatitis in infants, and a 2-3 year open-label phase to evaluate the effect of early intervention versus delayed intervention with Elidel on the incidence of asthma in children (Novartis Pharmaceuticals Corp.)
